

VEHICLE EMISSION REPAIR INDEX

Indiana Certified Emission Repair Facilities & Waiver Requirements

Featuring repair data collected from
January 1, 2024 to December 31, 2024

WHAT IS A WAIVER?

A waiver is a temporary extension that gives the vehicle owner extra time to make additional repairs before the next time the vehicle is due for emissions testing. Only one waiver, valid for one test cycle can be issued in the lifetime of the vehicle. A vehicle must meet all requirements listed below to be eligible for a waiver.

WAIVER ELIGIBILITY CHART

To use this chart, find your vehicle's model year in the first column then read across the page to see the waiver requirements. *A VEHICLE MUST MEET ALL OF THE APPLICABLE QUALIFICATIONS TO BE ELIGIBLE FOR A WAIVER.*

MODEL YEAR	AMOUNT SPENT	REPAIRS PERFORMED BY	MILEAGE	IMPROVEMENT	EMISSIONS CONTROLS
1976-1980	At least \$75 since initial failure	Anyone	No minimum	Must show overall improvement in exhaust gas readings	Must be present and visually operational
1981-1995	At least \$300 since initial failure	Indiana Certified Emission Repair Facility	No minimum	Must show overall improvement in exhaust gas readings	Must be present and visually operational
1996-2017	At least \$450 since initial failure	Indiana Certified Emission Repair Facility	At least 150,000 miles	Must have fewer Diagnostic Trouble Codes than initial failure; A REJECT result does not qualify for a waiver	Must be present and visually operational

HOW TO APPLY

If your vehicle meets all of the applicable waiver qualifications, present all original receipts detailing specific parts and repairs made to station management to apply for a waiver. Once station management confirms your vehicle meets all applicable waiver criteria, an appointment with Clean Air Car Check's Repair Advisor will be scheduled.

The Repair Advisor will verify repairs before a waiver can be approved.

If your vehicle does not meet the waiver criteria and you need assistance navigating the repair process, please call our Customer Service Hotline to speak with a representative.

WHAT QUALIFIES A FACILITY FOR STATE CERTIFICATION?

To become Indiana Certified Emission Repair Facilities, a facility must employ at least one technician who has completed an extensive 60-hour training course in the diagnosis and repair of emissions failures. This course is designed specifically for the requirements of the Indiana Clean Air Car Check program. These facilities also maintain equipment and tools that are necessary to properly diagnose and repair emissions failures.

Only repairs performed by facilities listed in this document will apply toward a waiver on a vehicle that is newer than model year 1981.

HOW TO USE THE VEHICLE EMISSION REPAIR INDEX (VERI)

This document is a resource for customers who are choosing a facility to perform repairs to a vehicle that is not passing an emissions test. The Vehicle Emission Repair Index (VERI) shows how successful Indiana Certified Emission Repair Facilities are when repairing vehicles that are failing or rejecting. In addition to basic information about each facility, this chart includes the number of vehicles each facility has repaired in a 12 month period and the number of those vehicles that passed after repairs. The shops with the most success will have numbers that are close to each other.

CITY	FACILITY NAME	ADDRESS	PHONE	DOMESTIC	IMPORTS	TOTAL EMISSION RELATED REPAIRS	TOTAL VEHICLES PASSED AFTER REPAIRS
